Subject: Re: Anacostia Paper

The paper was not attached.

The goal of this was to provide an overview of the Anacostia stuff for next week. I have separate papers for the trash and toxics Tmdl's that I am going to review tomorrow and will forward for the 5/28 briefing.

Ex. 5 Deliberative Process (DP)

Steve has seen a prior iteration of this paper. I only updated the status on page 2.

Subject: Anacostia Paper

Cathy,

Attached is the paper that we discussed should be shared with Cosmo in preparation for the May 22 meeting with DOEE. The attached paper provides and overview of activities in the Anacostia. I updated a previous paper and included an item on the status of the Pepco NPDES permit.

Please let me know if you have any comments or if I should sent to the front office mailbox as background materials for Cosmo's meeting next week.

Thanks,
Michelle
